

# MATTHEW SMITH

Junior Frontend Developer (React)

## Summary

Portfolio: <https://port-inky.vercel.app>

Github: <https://github.com/muks80>

I am a junior web developer with a strong knowledge of JavaScript (ES6), React, CSS and HTML. During lockdown, I put my time to good use and started my coding journey by completing a number of courses and building my own projects to hone my newly acquired skills. Once I started I instantly got a buzz from problem solving and creating genuinely useable apps that work. I was hooked and knew coding and web development was what I wanted to pursue as a new career. I am currently doing an internship in a front-end role, and I'm now looking for the right opportunity to develop my skills further as a junior developer.

My background has been in financial services working in teams in a high pressured environment where excellent communication, interpersonal and time management skills were essential. This is something I hope to be able to bring with me into my next role given the opportunity.

## Work Experience

### Humanitarian Operations - *Front-end Developer Intern*

01/12/2021

Assisting the front-end team in building the charity's internal system for their augmented reality education app and fundraising website using React, JavaScript, Bootstrap, CSS and HTML.

#### Main responsibilities:

- Build re-useable React components for the internal system from wireframes and designs
- Connect the frontend of the internal system to the .NET and AWS backend using restful APIs
- Check/refactor existing code to fix bugs and make the code more clean and readable
- Integrate Bootstrap into the internal system to replace the existing vanilla CSS code
- Check and review colleagues' code
- Version Control using GitHub
- Build fundraising website at short notice for the charity's Ukraine campaign

#### Key achievements:

- Implement a new employee form to be used by the HR department using React-Hook-Form
- Move the internal system away from CSS to Bootstrap making it easier

for all developers to create new pages/components more efficiently.

BNP Paribas Asset Management - *OTC Derivatives Middle Office and Collateral Management Analyst*

01/09/2014 - 26/02/2021

JP Morgan - *OTC Derivatives Trade Support Analyst*

October 2010 - March 2014

## Skills

Core skills - JavaScript,  
REACT, Next.js, CSS,  
HTML, Bootstrap,  
Material-UI, Semantic-UI,  
Materialize

Technologies I'm learning  
- TypeScript, Node.js,  
Express, MongoDB

## Projects

premiInfo - REACT Project

<https://github.com/muks80/premiinfo>

Euro 2020 Sweepstake Picker - JavaScript/REACT

<https://github.com/muks80/sweepstake>

Portfolio -JavaScript/Next.js/REACT
